

LMADRS ACCESSIBLE PLAYGROUND SAFETY MATTING

By US Playground Surfacing, LLC – *Surfacing Playgrounds Since 1986*

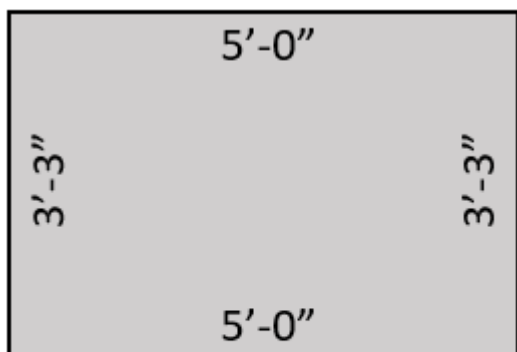

US Playground Surfacing

US Playground Surfacing, LLC supplied Playground Accessibility Matting is ADA & Verified Mass 521 CMR Compliant and provides an Economical and Low Maintenance Universally Accessible option for Playgrounds. This product is ideally suited for installation on US Playground Surfacing's IPEMA Certified Engineered Wood Fiber (EWF) Surfacing.

Product Representative Photos:

Product Dimensions:

0.9" Thickness

Product Installation: Installers should ensure there are 12 inches of IPEMA Certified Playground Safety Surfacing on the entire area before starting. If not, add IPEMA Certified Playground Safety Surfacing as necessary to achieve 12" depth prior to installation of matting. Engineered Wood Fiber (EWF) should be dug out **to allow the outside edge of the assembly to be flush** with the other surfacing. Assemble individual mats together with Morris 20158 Ultraviolet Nylon Cable Tie with 40-Pound Tensile Strength, 6-Inch Length, Black (or approved equal) along seams using 1 tie for every 5 holes in mats. Mats shall be compact, flat, and flush to each other to form a uniform flat playground surface. Tighten and cut excess tie material below top surface of matting and dispose of cuttings responsibly. EWF should be dug out **to allow the outside edge of the assembly to be flush** with the other surfacing.

Product Specification: These Accessibility Mats have been safety tested and comply with ASTM F1292, F1292-18 (Section 4.2), ASTM F3351-19 and ASTM F1951. All certifications are available upon request.

Key Product Information:

Combination of the Accessible Matting on top of an Engineered Wood Fiber provides Critical Fall Heights of up to 20 feet

- Compliant for All Playground Use Zones, Accessible Routes, Turning Places, etc.
- Meets the ADA and 521 CMR Guidelines for a Firm, Stable, Slip Resistant, Permanent Surface.
- Warranty (details available upon request)
